

Value Acceleration Workshop: SAP landscape extended with a Data Lake on Google Cloud

Enrich your SAP landscape with Data Lake on Google Cloud to gain unprecedented insights and optimize customer experience. To get there, the development of a Minimum Viable Product (MVP) is the best starting point - and the Value Acceleration Workshop is the best starting point for your MVP.

How do you benefit?

- You know your approach to your Data Lake for your SAP landscape
- You are prepared for the Google Cloud Platform
- You align business and IT goals of your project
- You have a sound plan of attack

What can you expect?

- A profound introduction to Data Lakes for SAP landscapes on Google Cloud from the leading Google Cloud Premier Partner in the DACH region
- The definition of the most suited use case for your MVP (Business Stream)
- The definition of the MVP IT Project Scope (Technical Stream)

How do you get there?

The Wabion Value Acceleration Workshop is divided into a Business Stream and a Technical Stream. Both streams take half a day and include sections that are moderated by Wabion or focussed on input from the Customer:

Business Stream

- ① Introduction to Data Lake projects
- ② The customer's long term strategy for the SAP landscape enriched with a Data Lake on GCP
- ③ Use Cases identified by the customer
- ④ Discussion and selection of the use case for the MVP
- ⑤ Definition of KPIs to measure the success of the MVP
- ⑥ Decision on MVP project ownership and formation of steering board
- ⑦ MVP project timeline

Technical Stream

- ① Overview of Data Lake solution with Google Cloud
- ② Presentation of customer source systems for MVP
- ③ Presentation of security/ compliance requirements for MVP
- ④ Identification of challenges for MVP project
- ⑤ Definition of scope of MVP project
- ⑥ Priority-setting for tackling identified challenges ("prioritized backlog")
