

SAP on GCP Business Case: The financial perspective of your migration

By shifting its SAP landscape to Google Cloud, organizations are able to reduce infrastructure and operating expenses by up to 50%. Discover the potential positive financial impact of your SAP on GCP migration with your individual business case calculation.

Reasons to migrate to Google Cloud

- Some of the largest SAP-certified virtual machines
- Global, secure and scalable foundation
- Minimized downtime for maintenance
- Increased flexibility to match your business growth
- Innovation opportunities with Google Cloud features

Example of a real business case scenario:

This is a real case scenario of a business case calculated by ITPC. In a hosted scenario, this organization spent CHF 750'000 on infrastructure

and managed services, without having any cost-transparency. By migrating its SAP landscape to the cloud, this company was able to cut costs by 30%, including the most complete Managed Services package (Total for infrastructure and managed services of CHF 525'000).

How to get your own business case

To calculate your SAP on GCP business case, all we need is your SAP infrastructure details, such as Amount, types and release status of SAP systems. The full list of the needed SAP details can be downloaded here: <https://bit.ly/3aneTVu>

- 1 Download the Excel questionnaire here: <https://bit.ly/3aneTVu>
- 2 Fill it with the details of your SAP infrastructure
- 3 Send it to sales@itpcorp.com
- 4 We calculate your individual SAP landscape on GCP and present it to you
