

S/4HANA Assessment: The start of your SAP transformation

To harness the full innovation potential of SAP and benefit from the new technologies that enable an intelligent ERP, a migration to S/4HANA is inevitable. Don't wait for the 2027-deadline to leverage the innovations of SAP and GCP – start your digital transformation with the S/4HANA Assessment now.

Reasons to conduct the assessment

- Get the overview and plan ahead
- Evaluate the different pathways to S/4HANA
- Functional and technical analysis of your update
- Based on your current SAP landscape and your requirements for S/4HANA

Outcomes of the assessment

- SAP S/4HANA Readiness Check
- Overview of new features of S/4HANA
- Architecture design proposals
- Conversion path options
- Migration plan with milestones and dates

Steps of the assessment

- ① Kick-off meeting: Detailed explanation of the assessment.
- ② 'Current situation' workshop: Understand your situation in the following dimensions:
 - a) Current landscape: how does your current SAP landscape look?

- b) Modifications: which adjustments to your current SAP were made?
- c) Infrastructure requirements: what specifications do you need of S/4HANA?

- ③ Business transformation to SAP S/4HANA: Functional analysis on the transformation with:
 - a) Process workshop: what are the (core) business processes of your company?
 - b) Presentation of new features in S/4HANA
 - c) Delta workshops: which innovations of S/4HANA have an effect on your business processes?
 - d) Greenfield vs. brownfield: How should the transition to SAP S/4HANA look like?
- ④ Architecture design options: 1-3 proposals for a future architecture design are worked out
- ⑤ Roadmap to SAP S/4HANA: A high-level migration plan is developed
- ⑥ Assessment review and closure: Presentation of the assessment outcomes
